

## Quality & Compliance Intern (full-time, 6 months)

Emerged from the Laboratory for Orthopaedic Biomechanics at ETH Zurich and the University of Zurich, the Swiss company ZuriMED Technologies AG was founded in 2015. Since then, the innovative company has striven to revolutionize the surgical repair of soft tissue by developing breakthrough high-potential medical devices. From the beginning, ZuriMED's ultimate goal has been to develop emerging technologies and products that have the potential to significantly improve surgeons' quality of treatment and, ultimately, patients' quality of life. By combining established and novel biomaterials with internally developed technologies, the company aims to bridge the gap between current surgical procedures and unmet clinical needs.

With our medical devices now on the market, we are seeking a dynamic and highly motivated individual to help drive quality, compliance, and continuous improvement within our Quality team. This role offers a unique opportunity to be part of a pioneering MedTech company and gain comprehensive insights into ZuriMED's Quality Management System (QMS) and its full range of operations.

### **Main responsibilities:**

- Conduct quality checks and inspections of incoming products, ensuring compliance within a regulated environment.
- Assist in the development and maintenance of documentation for the Quality Management System (QMS).
- Support activities related to post-market surveillance
- Support activities related to product traceability along the supply chain.
- Participate in the planning and conducting of internal, external, and supplier audits.
- Assist in the documentation and implementation of Nonconformities and Corrective and Preventive Action (CAPA) reports to support continuous quality improvement efforts.
- Work as part of the design and development process of new medical technologies and their regulatory approval pathway.

### **Qualifications:**

- Holds a Bachelor's degree or is currently pursuing or has completed a Master's degree in a technical field (i.e., Engineering, Microbiology, Quality Management, or a similar degree).
- Strong analytical and data analysis skills, as well as a problem-solving and risk assessment approach.
- Strong communication in English (verbal and written) and interpersonal skills.
- Basic knowledge of Quality Management Systems according to ISO 13485 or ISO 9001 is beneficial.

**Zurimed**<sup>®</sup>  
Innovative Orthopedics

**What we offer:**

- Availability to work on-site and remotely
- Flexible working hours
- Dynamic work environment
- Opportunity to contribute innovative ideas and take on significant responsibilities
- Inclusive and young team

**Duration:** 6 months

**Start date:** preferably in September 2026 (or upon agreement)
